Quartz®

Digital Exposed

Easy to install and even easier to operate, Quartz Digital can be fitted swiftly with little disruption to your bathroom.

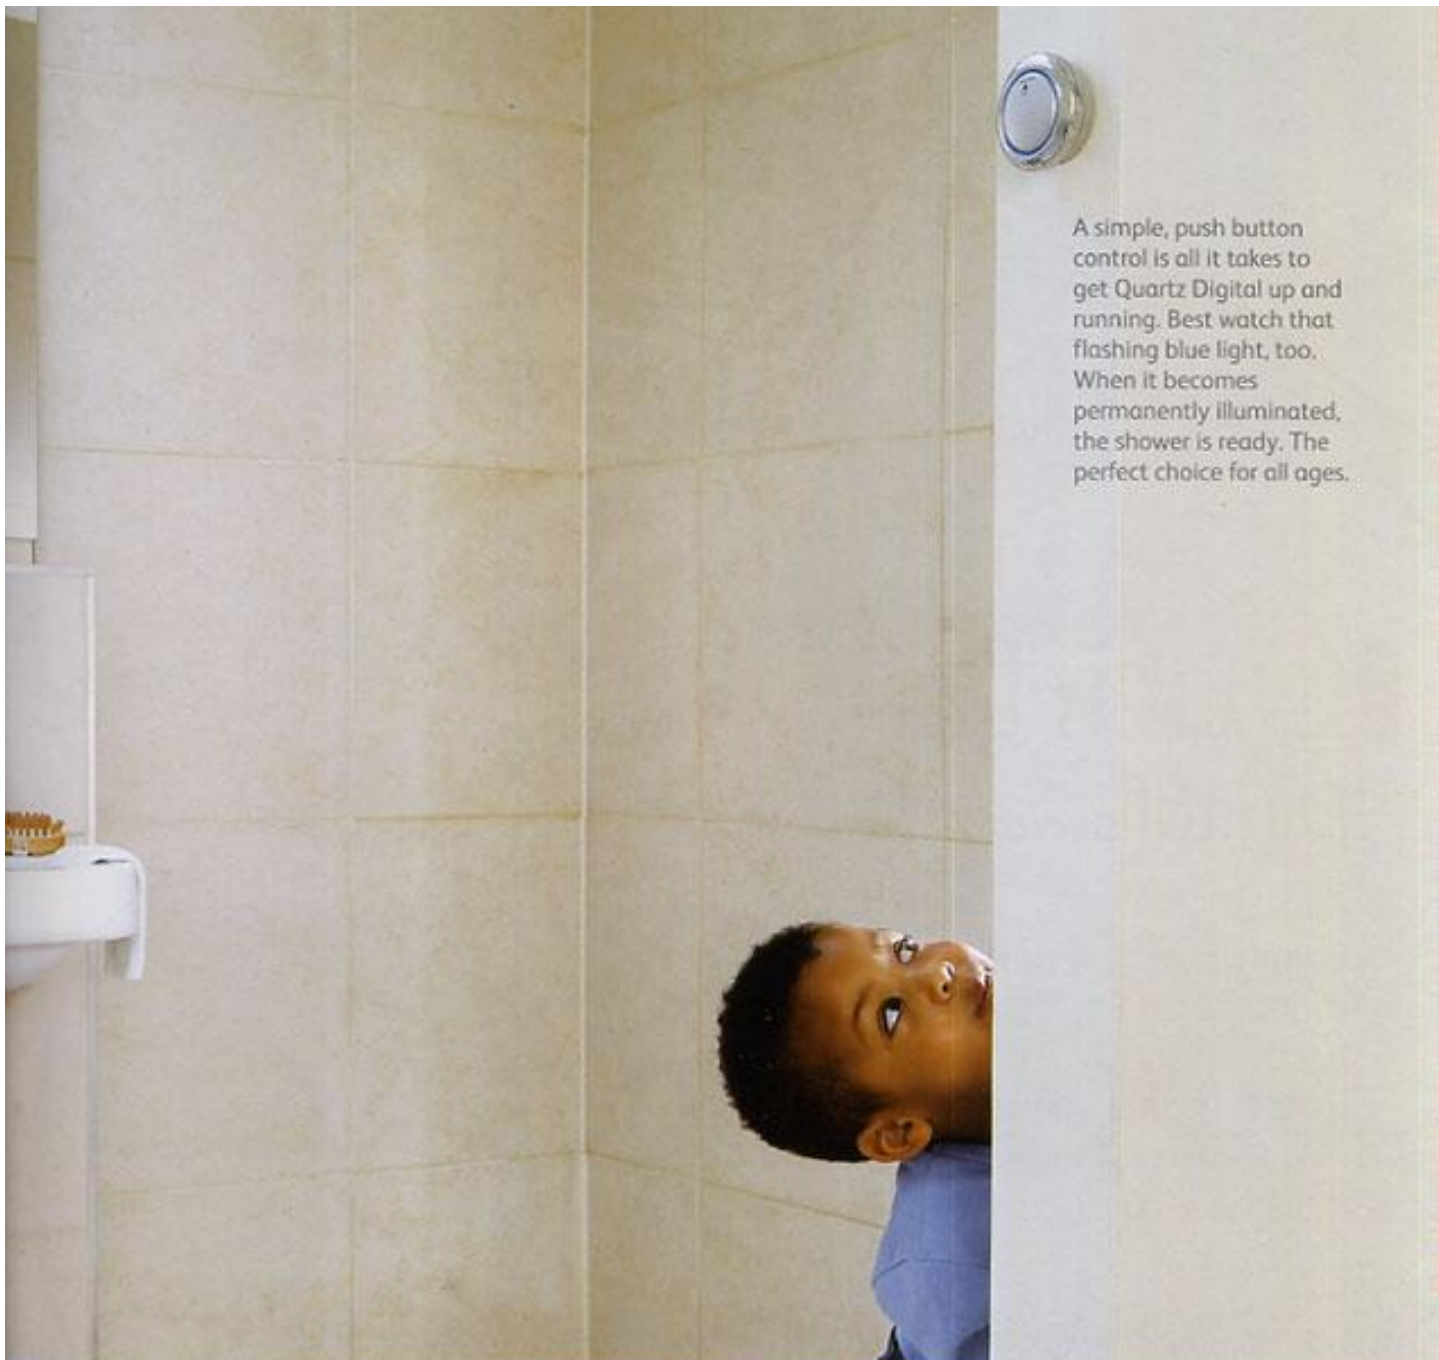

It's sometimes a challenge persuading younger children to shower. Quartz Digital makes wash-time fun, fast and safe for busy families thanks to its combination of simple one touch controls, unique safety features and superb power shower performance.

Quartz Digital sums up showering simplicity at its best.

Standard and pumped showers are available, making Quartz Digital ideal for the majority of water heating systems – and if you've opted for a pumped shower, you'll have the choice of even more oomph, courtesy of the 'boost' button.

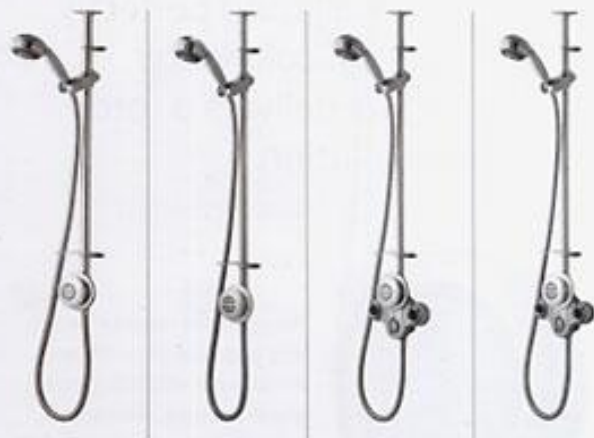

Thanks to its clever exposed design, there's no need for installation to cause damage to décor or tiling. The processor, which blends the water is situated away from the shower so you can make the most of your showering space too.

A simple, push button control is all it takes to get Quartz Digital up and running. Best watch that flashing blue light, too. When it becomes permanently illuminated, the shower is ready. The perfect choice for all ages.

NEW One click for on, one click for off. The new wireless remote control, suitable for Quartz Digital exposed and concealed, is easy to use and can be installed in minutes, with no damage to tiles or décor.

Quartz Digital showers are available as pumped or standard units.

Check page 48 for product codes, prices & dimensions.

Choose from adjustable height or fixed shower heads – all with Aqualisa's anti-scaling, clear flow technology.

NEW Quartz® Digital Concealed

Simply push the button, wait a moment for the flashing light to become steady... and step in. Quartz Digital sparked a generation of intelligent showers when it was launched – and it's just as cutting edge today.

Controlled by a processor that speeds installation, eliminates damage to walls and perfectly blends hot and cold water, Quartz Digital delivers a total showering solution.

An optional remote switch lets you turn your shower on without reaching into the enclosure. A new battery-less, wireless switch is also available.

Straightforward and easy to use, one simple touch switches Quartz Digital on and off.

Neat and compact, the concealed Quartz Digital is an especially good choice for smaller showering enclosures, where space is at a premium.

An unobtrusive wall plate can be fitted behind the shower's control to conceal any damage caused by your previous shower.

Choose from a fixed or adjustable height head and for the ultimate indulgence, why not add body jets?

Check page 48 & 49 for product codes, prices & dimensions. Boost option is only available on pumped models.

Aquastream®

Thermo

For get up and go showering, it's difficult to beat the Aquastream Thermo.

Boasting true power shower performance, the Aquastream Thermo is an all-in-one, thermostatic shower that, behind those ergonomic lines, cleverly conceals a booster pump. Perfect if space is in short supply.

And, as the Aquastream Thermo is surface mounted, there's likely to be less damage to tiling.

Two power options allow Aquastream Thermo to make the most of your plumbing system. Select from a flow rate of 10 litres or 18 litres per minute.* Then just wait for the deluge...

*Based upon 1m head of water.

Aquastyle[®]

Electric

The Aquastyle Electric's simple and compact design offers effective, efficient showering.

There's no demand on stored hot water and with its cool, unfussy looks, plus the promise of temperature controlled water for as long as you need it, the Aquastyle Electric is the perfect solution for en suite bathrooms or secondary shower rooms.

Aquastyle Electric is available with two performance ratings – 8.5kW or 9.5kW.

There's also a high/low selector switch that ensures you'll achieve optimum performance during both summer and winter months.

Aquastyle Electric comes complete with an adjustable height shower head with five spray patterns.
